## Vallejo Sanitation & Flood Control District PERMIT REQUIREMENTS

If your business or development project has **ANY**DISCHARGE in excess of hand washing and toilet use, you must fill out a PRE-TREATMENT QUESTIONNAIRE and submit it to the Vallejo Sanitation & Flood Control District Engineering Department for review.

In addition, ANY CHANGE OF USE in residential or commercial sites that changes the amount, strength or type of sewer flow (if you add a kitchen or in-law unit to a private residents, or change a warehouse into a restaurant, for example), or increases your stormwater runoff flow (increasing a building's footprint or parking area) requires you to also submit a SANITARY SEWER INFORMATION FORM to the Vallejo Sanitation & Flood Control District Engineering Department for review.

• • • •

Based on this required information, the District's Engineering Department will determine if any connection fees are due, and what rates you will be charged. In most cases, your development plans will need to be submitted at the same time.

If your sanitary sewer or storm drain connection is changed in any way, even if there is no change of use, your development must be reviewed by the District's Engineering Department. Please submit your plans to the District office at 450 Ryder Street in Vallejo.

If you have any questions, please call us at (707) 644-8949 ext. 200.
